

## *D.A.V B.R.S Organizes Workshop on Understanding Physics*

### *Through Demonstration*

Physics is not a subject to be learned only in the classrooms but has wider application in our day today lives. The lecture was organised under the aegis of Regional Council Punjab & J&K. Dr B.S. Sidhu, Chairman I.A.P.T ( Indian Association Of Physics Teachers), Kanpur and a passionate physics teacher was the resource person of the day. Dr. Sidhu travels far and wide to take his subjects to the students and teachers to familiarize them with the concepts of the physics through simple demonstration to arouse their interest in the subject.

Dr. B.S Sidhu advised the students to refrain from cramming and stressed on clearing the concepts as it goes a long way in retaining interest and helping an extra mile to gain in depth knowledge of the subject.

He created a virtual lab in school auditorium and taught topics like Employing laser to find length, volume an area, Dimensional Analysis, Trigonometric Ratios, Principles of Vernier Calipers, Organic Pipe and Pair Production and Annihilation through Power Point Presentation that kept the students glued to their seats and ask several questions to clear their doubts. It was an highly interactive session enjoyed by the teachers and the students alike.

Principal, Mrs. J.K. Sidhu thanked. Dr. B.S. Sidhu for taking out time from his busy schedule and explaining several concepts to the students of the school. She felt that it was on account of teachers like Dr. Sidhu that the students take Concepts of Physics as topics of their research.
