DAV, BRS, organised a workshop on 'Understanding physics through demonstration' on Wednesday. Physics is not just a subject to be learned only in classrooms but has a wider application in our daily lives. The lecture was organised under the aegis of Regional Council Punjab & J&K. Dr BS Sidhu, Chairman, IAPT (Indian Association Of Physics Teachers), Kanpur, was the resource person of the day. Dr Sidhu advised the students to refrain from cramming and stressed on clearing the concepts as it goes a long way in retaining interest and helping an extra mile to gain in depth knowledge of the subject.
